Subject Index to Volume 59

ADENOCARCINOMA
  effects of dietary fiber on cancers of the gastric cardia, 372–374 (Nov)
ADOLESCENTS
  influence of eating at home on diet, 57–60 (Feb)
AGING
  ability to detect bitter taste, 165 (Jun)
  antioxidants and cognitive function, S75–S82 (Aug)
  B vitamin status and cognitive decline, S69–S74 (Aug)
  calcium absorption and risk for hip fracture, 338–341 (Oct)
  effects of nutrition, S88–S92 (Aug)
  genetic influences and successful aging, S93–S101 (Aug)
ALCOHOL
  relation to mortality, 293–297 (Sep)
ALZHEIMER'S DISEASE
  antioxidants and cognitive function, S75–S82 (Aug)
  genetic polymorphisms and diseases of the elderly, S93–S94 (Aug)
  nutrition and aging, S91–S92 (Aug)
ANEMIA
  fatigue, S17–S19 (Jan)
ANIMAL MODELS
  monoamines and protein intake, S60–S68 (Aug)
  of neural tube defects, S14–S18 (Aug), S23 (Aug), S26 (Aug)
ANTIOXIDANTS
  antioxidant therapy for bronchopulmonary dysplasia in premature infants, 10–17 (Jan)
  cognitive function in the elderly, S75–S82 (Aug), S89–S90 (Aug)
  effect on mitochondrial gene expression in diabetes mellitus, 61–70 (Mar)
  melatonin as an indirect antioxidant, 286–287 (Sep)
APOLIPOPROTEIN E
  effects on lipid levels and cognition in the elderly, S94–S97 (Aug)
APPETITE
  relationship of monoamines and protein intake, S60–S68 (Aug)
AROMATIC HYDROCARBONS
  meat consumption and risk for colorectal cancer, 37–47 (Feb)
ARTHRITIS
  effects of breastfeeding on rheumatoid arthritis, 264–268 (Aug)
  effects of vitamin E and fish oil in diet on rheumatoid arthritis, 335–338 (Oct)
ASIA
  insulin resistance syndrome in India, 1–9 (Jan)
  trends in diet, nutritional status, and disease in China and India, 379–390 (Dec)
AUSTRALIA
  obesity initiative, S45–S52 (Mar)

BC-DIOX
  cleavage of ß-carotene to retinal, 116–118 (Apr)
BIRTH DEFECTS
  fetal malformations and folate metabolism, 215–235 (Jul)
  role of folate in prevention of neural tube defects, S13–S23 (Aug)
BIRTH WEIGHT
  insulin resistance syndrome in India, 1–9 (Jan)
  relationship of maternal nutrition and perinatal survival, 315–326 (Oct)
BLOOD PRESSURE
  interventions to reduce cardiovascular disease risk, 197–215 (Jul)
  sodium restriction, 291–293 (Sep)
BODY COMPOSITION
  effects of dietary fiber, 129–139 (May)
BODY MASS INDEX
  interventions to reduce cardiovascular disease risk, 197–215 (Jul)
  newly published childhood growth percentiles, 31–36 (Feb)
BODY WEIGHT
  American Heart Association Dietary Guidelines for 2000, 298–299 (Sep)
  dietary energy density and weight regulation, 247–258 (Aug)
  effects of dietary fiber, 129–139 (May)
  individual response to overeating, 48–51 (Feb)
  psychological and cultural aspects of energy, S5–S12 (Jan)
  weight loss, S25–S26 (Jan)
BONE MINERAL DENSITY
  bone remodeling transient, 327–333 (Oct)
  calcium absorption, 338–341 (Oct)
BONE REMODELING
  bone remodeling transient, 327–333 (Oct)
BRAIN
  effects of iron status on function and dysfunction,

S83–S87 (Aug)
effects of malnutrition on cellular growth, S9–S10 (Aug)
effects of nutrition on development, S7–S12 (Aug)
effects of polyunsaturated fatty acids on central nervous system, S34–S48 (Aug)
impact of brain glucose supply on mood and memory, S20–S21 (Jan)
macronutrients and neurotransmitter formation during development, 344–346 (Oct)
myelinization, S8 (Aug)
ontogenesis, S7–S8 (Aug)
BREASTFEEDING
association with rheumatoid arthritis, 264–268 (Aug)
effects of maternal dieting on infant growth, 18 (Jan)
influence on cognitive development, S27–S30 (Aug)
iodine in human milk, 269–278 (Aug)
long-chain polyunsaturated fatty acids in human milk, S36–S37 (Aug)
model of social change, S41–S56 (Mar)
transmission of human immunodeficiency virus, 119–127 (Apr)
BREAST
role of physical activity in lowering cancer risk, 349–357 (Nov)
BRONCHOPULMONARY DYSPLASIA
antioxidant therapy in premature infants, 10–17 (Jan)

CAFFEINE
bitter taste and effect on food choice, 166–168 (Jun)
content of selected beverages and foods, 97 (Apr)
effects on cognitive performance, mood, and energy, 91–102 (Apr)
influence on mental energy, S22–S24 (Jan)
CALCIUM
absorption and risk for hip fracture, 338–341 (Oct)
bone remodeling transient, 327–333 (Oct)
efficacy in reducing lead toxicity, 71–79 (Mar), [letter] 307–308 (Sep)
high intake during pregnancy to lower blood lead, 152–156 (May)
CANADA
nutrition and physical activity initiatives, S45–S52 (Mar)
CANCER
association of iron with risk for colorectal cancer, 140–148 (May), [letter] 310 (Sep), [letter] 344–346 (Oct)
diabetes mellitus as a risk factor for pancreatic cancer, 112–115 (Apr)
effects of dietary fiber on cancers of the gastric cardia, 372–374 (Nov)
fruits, vegetables, and colorectal cancer risk, 395–399 (Dec)
meat consumption and risk for colorectal cancer, 37–47 (Feb), [letter] 375–377 (Nov)
role of dietary fiber in prevention of colorectal cancer, 84–86 (Mar)
role of physical activity in lowering cancer risk, 349–357 (Nov)
CARDIOVASCULAR DISEASE
association of alcohol consumption and mortality, 293–297 (Sep)
effects of phytosterols, 21–24 (Jan)
efficacy of garlic supplementation in lowering serum cholesterol, 236–241 (Jul)
nutritional and physical activity interventions to reduce risk, 197–215 (Jul)
ß-CAROTENE
cleavage to retinal, 116–118 (Apr)
conversion to vitamin A [letter], 309 (Sep)
CENTERS FOR DISEASE CONTROL AND PREVENTION
newly published childhood growth percentiles, 31–36 (Feb)
CHILDREN
calcium supplements in reducing lead toxicity in children, 71–79 (Mar)
human immunodeficiency virus, 358–369 (Nov)
influence of family and childcare providers on diet, 224–235 (Jul)
micronutrient deficiencies and health, 358–369 (Nov)
newly published childhood growth percentiles, 31–36 (Feb)
CHILE
nutrition transition, 170–176 (Jun)
CHINA
economic costs of nutrition transition, 383–388 (Dec)
trends in diet, nutritional status, and disease, 379–390 (Dec)
CHOLESTEROL
American Heart Association Dietary Guidelines for 2000, 300–302 (Sep)
effects of phytosterols, 21–24 (Jan)
efficacy of garlic supplementation in lowering serum cholesterol, 236–241 (Jul)
interventions to reduce cardiovascular disease risk, 197–215 (Jul)
CIRCADIAN RHYTHMS
discussion and clinical findings, S27–S29 (Jan)
CLEFT LIP/PALATE
folate status, 217–218 (Jul)
COGNITIVE DEVELOPMENT
contributions of Joaquín Cravioto to research, S2–S6 (Aug)
effects of nutrition, S7–S12 (Aug), S24–S33 (Aug)
influence of breast milk, S27–S30 (Aug)
COGNITIVE FUNCTION
B vitamins and homocysteine, S69–S74 (Aug)
effects of antioxidants, S75–S82 (Aug)
effects of ginseng, ephedrine, and caffeine, 91–102 (Apr)
impact of brain glucose supply on mood and memory, S20–S21 (Jan)

influence of diet on mental energy, S22–S24 (Jan)
iodine content in human milk, 269–278 (Aug)
nutrition and aging, S88–S92 (Aug)
COLON
role of physical activity in lowering cancer risk, 349–357 (Nov)
COLORECTAL CANCER
association of iron with risk, 140–148 (May), [letter] 310 (Sep), [letter] 344–346 (Oct)
conflicting data on protective role of fruits and vegetables, 395–399 (Dec)
meat consumption and risk, 37–47 (Feb), [letter] 375–377 (Nov)
role of dietary fiber in prevention, 84–86 (Mar)
CONFERENCE PROCEEDINGS
Defining Energy for a New Millenium, S1–S39 (Jan)
introduction, S1 (Jan)
summary, S39 (Jan)
Summit on Promoting Healthy Eating and Active Living: Developing a Framework for Progress, S1–S76 (Mar)
introduction, S4–S6 (Mar)
summary, S63–S65 (Mar)
participants, S66–S74 (Mar)
Third Nestlé Nutrition Conference: Nutrition and Brain Function from Infancy to Old Age, S1–S103 (Aug)
Foreword, S1 (Aug)
COPPER
role of cellular transporters in homeostasis, 281–285 (Sep)
CRAVIOTO, JOAQUÍN
contributions to research on malnutrition and mental development, S2–S6 (Aug), S11 (Aug)
CYP26 ENZYME
retinoic acid homeostasis, 391–394 (Dec)

DEMENTIA
tube feeding in patients with advanced dementia, 86–88 (Mar)
DIABETES
association of insulin resistance and leptin deficiency, 177–179 (Jun)
diabetes mellitus as a risk factor for pancreatic cancer, 112–115 (Apr)
eating disorders in young females with type 1 diabetes mellitus, 179–182 (Jun)
in Chile, 174–175 (Jun)
insulin resistance syndrome in India, 1–9 (Jan)
mitochondrial gene expression in diabetes mellitus, 61–70 (Mar)
phenotypes, 61–62 (Mar)
response to high-fiber diet, 52–55 (Feb)
DIET
association of fruits and vegetables with risk for stroke, 24–27 (Jan)
benefits of variety, 156–158 (May)
determinants of eating behavior, S11–S20 (Mar)
dietary factors related to chronic disease in Chile, 172
discussion of model to change lifestyle choices, S57–S62 (Mar)
effects of bitter taste, 163–169 (Jun)
factors influencing food choice, S21–S39 (Mar)
fruits, vegetables, and colorectal cancer risk, 395–399 (Dec)
high-fiber foods and type 2 diabetes mellitus, 52–55 (Feb)
influence of eating at home on healthy diet, 57–60 (Feb)
influence of family and childcare providers on fruit, juice, and vegetable consumption, 224–235 (Jul)
influence on mental energy, S22–S24 (Jan)
interventions in women to reduce cardiovascular disease risk, 197–215 (Jul)
meat consumption and risk for colorectal cancer, 37–47 (Feb), [letter] 375–377 (Nov)
nutrition transition in India and China, 379–390 (Dec)
public health consequences of poor diet, S10 (Mar)
sodium restriction in managing hypertension, 291–293 (Sep)
weight loss, S25–S26 (Jan)
whole grain intake and risk of ischemic stroke, 149–152 (May)
DIETARY APPROACHES TO STOP HYPERTENSION (DASH)
sodium restriction in managing hypertension, 291–293 (Sep)
DIETARY GUIDELINES
American Heart Association Dietary Guidelines for 2000, 298–306 (Sep)
DIETARY INTAKE
accuracy of food-frequency questionnaires, 370–372 (Nov)
DIURETICS
thiamin deficiency in heart failure patients [letter], 342–344 (Oct)
DOWN SYNDROME
folate status, 218–220 (Jul)

EATING DISORDERS
prevalence in diabetic young females, 179–182 (Jun)
ENERGY
anemia, S17–S19 (Jan)
assessment of physical and mental energy, 91–92 (Apr)
consumer perceptions, S2–S4 (Jan), S39 (Jan)
Defining Energy for a New Millenium [conference proceedings], S1–S39 (Jan)
diet, neurochemicals, and mental energy, S22–S24 (Jan)
during exercise, S14–S16 (Jan)
effects of dietary fiber on regulation and intake, 129–139 (May)
effects of ginseng, ephedrine, and caffeine, 91–102

(Apr)
expenditure, S13–S14 (Jan)
fatigue and stress, S30–S32 (Jan)
impact of glucose supply to brain, S20–S21 (Jan)
physical energy and fuel metabolism, S13–S16 (Jan)
psychological and cultural aspects, S5–S12 (Jan)
regulation of food claims, S33–S34 (Jan), S35 (Jan), S36–S38 (Jan)
sleep and circadian rhythms, S27–S29 (Jan)
weight loss, S25–S26 (Jan)
ENERGY DENSITY
dietary energy density and weight regulation, 247–258 (Aug)
ENGLAND
physical activity initiative, S45–S52 (Mar)
ENVIRONMENT
ability to effect social change, S57 (Mar)
factors influencing food choice and physical activity, S21–S39 (Mar)
EPHEDRINE
effects on cognitive performance, mood, and energy, 91–102 (Apr)
EPIDEMIOLOGY
accuracy of food-frequency questionnaires, 370–372 (Nov)
application of nutrition methodology to studies of cancer and physical activity, 349–357 (Nov)
evidence on meat consumption and risk for colorectal cancer, 37–47 (Feb), [letter] 375–377 (Nov)
ESOPHAGUS
effects of dietary fiber on cancers, 372–374 (Nov)
ESTROGEN REPLACEMENT THERAPY
effects on heart disease risk, S94–S96 (Aug)
ETHIOPIA
zinc supplementation trial, 80–84 (Mar)
EUROPEAN UNION
nutrition initiative, S45–S52 (Mar)

FAMILY LIFE
influence of eating at home on healthy diet, 57–60 (Feb)
influence on food choice patterns, 224–265 (Jul)
FATIGUE
anemia, S17–S19 (Jan)
association with stress and behavioral energy, S30–S32 (Jan)
FATTY ACIDS
effects of nuts on coronary heart disease risk, 103–111 (Apr)
effects of polyunsaturated fatty acids on central nervous system, S34–S48 (Aug)
long-chain polyunsaturated fatty acid content in human milk, S36–S37 (Aug)
response of uncoupling proteins in skeletal muscle during starvation, 56–57 (Feb)
FEDERAL FOOD, DRUG AND COSMETIC ACT
regulation of functional claims, S36–S38 (Jan)
FEDERAL TRADE COMMISSION
energy-related food claims, S35 (Jan)
FIBER
effects of dietary fiber on cancers of the gastric cardia, 372–374 (Nov)
effects of dietary fiber on weight regulation, 129–139 (May)
response of patients with type 2 diabetes mellitus to high-fiber diet, 52–55 (Feb)
role of dietary fiber in prevention of colorectal cancer, 84–86 (Mar)
FINLAND
physical activity initiative, S45–S52 (Mar)
FISH OIL
effects on rheumatoid arthritis, 335–338 (Oct)
FLAVOR
components and effects of bitter taste, 166 (Jun)
FOLATE
fetal malformations, 215–235 (Jul)
genetic influences on status, 215–216 (Jul)
intergenerational effects of supplementation, S17–S18 (Aug)
mechanisms of pathogenesis in birth defects, 216–220 (Jul)
neurocognitive function in the elderly, S69–S74 (Aug), S89 (Aug)
role in prevention of neural tube defects, S13–S23 (Aug)
FOLIC ACID
supplementation for prevention of neural tube defects, 215–235 (Jul), S13–S23 (Aug)
FOOD AND DRUG ADMINISTRATION
energy-related food claims, S36–S38 (Jan)
FOOD CHOICE
determinants of eating behavior, S11–S20 (Mar)
influence of environmental and societal factors, S21–S39 (Mar)
FOOD PATHOGENS
Listeria monocytogenes, 183–194 (Jun)
FOOD-FREQUENCY QUESTIONNAIRES
accuracy of, 370–372 (Nov)
FRUITS
association with risk of ischemic stroke, 24–27 (Jan)
influence of family and childcare providers on consumption, 224–235 (Jul)
risk for colorectal cancer, 395–399 (Dec)
FUNCTIONAL FOODS
effects of nuts on coronary heart disease risk, 103–111 (Apr)
efficacy of garlic supplementation in lowering serum cholesterol, 236–241 (Jul)
ginseng, 91–102 (Apr)
whole grain intake and risk of ischemic stroke in women, 149–152 (May)

GARLIC
efficacy of supplementation in lowering serum

cholesterol, 236–241 (Jul)
GASTRIC CARDIA
effects of dietary fiber on cancers, 372–374 (Nov)
GENETICS
aging, S93–S101 (Aug)
mitochondrial gene expression in diabetes mellitus, 61–70 (Mar)
studies of taste perception, 163–165 (Jun)
GENOMICS
applications in nutrition metabolism research, 259–263 (Aug)
GINSENG
effects on cognitive performance, mood, and energy, 91–102 (Apr)
GLUCOSE
impact of brain supply on mood and memory, S20–S21 (Jan)
GOVERNMENT REGULATIONS
for energy-related claims, S33–S34 (Jan), S35 (Jan), S36–S38 (Jan)
GRAINS
whole grain intake and risk of ischemic stroke in women, 149–152 (May)
GROWTH
micronutrient deficiencies in children, 362–363 (Nov)
newly published childhood growth percentiles, 31–36 (Feb)
populations at risk for zinc deficiency, 80–84 (Mar)
GUATEMALA
contributions of Joaquín Cravioto to malnutrition research, S2–S6 (Aug)
GUIDELINES FOR AUTHORS, 29 (Jan)

HEALTH INDICATORS
Latin America, 171 (Jun)
ten leading health indicators from Healthy People 2010, S7 (Mar)
HEALTHY PEOPLE 2000
objectives and progress, S7 (Mar)
HEALTHY PEOPLE 2010
objectives and description, S7–S9 (Mar)
HEART DISEASE
American Heart Association Dietary Guidelines for 2000, 298–306 (Sep)
effects of nuts on risk, 103–111 (Apr)
folate status in congenital heart defects, 218 (Jul)
in elderly women, S94–S97 (Aug)
insulin resistance syndrome in India, 1–9 (Jan)
thiamin deficiency in heart failure patients [letter], 342–344 (Oct)
HETEROCYCLIC AMINES
meat consumption and risk for colorectal cancer, 37–47 (Feb)
HIP FRACTURE
calcium absorption and risk, 338–341 (Oct)
HOMOCYSTEINE
neurocognitive function in the elderly, S69–S74 (Aug)
vascular disease risk, 242–244 (Jul)
HUMAN IMMUNODEFICIENCY VIRUS
micronutrient deficiencies, 358–369 (Nov)
transmission during breast-feeding, 119–127 (Apr)
HUMAN MILK
iodine content, 269–278 (Aug)
transmission of human immunodeficiency virus, 119–127 (Apr)
HUNGER
dietary energy density and weight regulation, 247–258 (Aug)
effects of dietary fiber, 129–139 (May)
HYPERTENSION
American Heart Association Dietary Guidelines for 2000, 301–302 (Sep)
interventions to reduce cardiovascular disease risk, 197–215 (Jul)
sodium restriction, 291–293 (Sep)
HYPERTHERMIA
neural tube defects, S21 (Aug)

IMMUNITY
populations at risk for zinc deficiency, 80–84 (Mar)
INDIA
economic costs of nutrition transition, 383–388 (Dec)
insulin resistance syndrome, 1–9 (Jan)
Pune Maternal Nutrition Study, 4–5 (Jan)
trends in diet, nutritional status, and disease, 379–390 (Dec)
INFANTS
antioxidant therapy for bronchopulmonary dysplasia, 10–17 (Jan)
effects of maternal dieting while breastfeeding on growth, 18 (Jan)
effects of nutrition on cognitive development, S7–S12 (Aug), S24–S32 (Aug)
effects of polyunsaturated fatty acids on central nervous system function, S36–S43 (Aug)
fetal malformations and folate metabolism, 215–235 (Jul)
iodine in human milk, 269–278 (Aug)
relationship of maternal nutrition and perinatal survival, 315–326 (Oct)
transmission of human immunodeficiency virus during breast-feeding, 119–127 (Apr)
INSULIN RESISTANCE
association with leptin deficiency, 177–179 (Jun)
syndrome in India, 1–9 (Jan)
IODINE
in human milk, 269–278 (Aug)
requirements, 273–274 (Aug)
IRON
association with risk for colorectal cancer, 140–148 (May), [letter] 310 (Sep), [letter] 344–346 (Oct)
effects on brain function and dysfunction, S83–S87 (Aug)

relation to chronic disease in the elderly, S97–S101 (Aug)
toxicity in the brain, S83–S87 (Aug)
IRON DEFICIENCY
fatigue, S17–S19 (Jan)
in the brain, S83–S87 (Aug)

JUICE
influence of family and childcare providers on consumption, 224–235 (Jul)

KENYA
transmission of human immunodeficiency virus through breastfeeding, 119–127 (Apr)
KWASHIORKOR
contributions of Joaquín Cravioto to malnutrition research, S2–S6 (Aug)

LATIN AMERICA
nutrition transition in Chile, 170–176 (Jun)
LEAD
calcium supplements in reducing toxicity in children, 71–79 (Mar)
high calcium intake during pregnancy to lower blood lead, 152–156 (May)
role of calcium in reducing toxicity [letter], 307–308 (Sep)
LEPTIN DEFICIENCY
association with insulin resistance, 177–179 (Jun)
LIFESTYLE
American Heart Association Dietary Guidelines for 2000, 298–306 (Sep)
dealing with lifestyle-related disease, S4–S6 (Mar), S7–S9 (Mar)
determinants of physical activity and eating behavior, S11–S20 (Mar)
diet, S10 (Mar)
factors influencing food choice and physical activity, S21–S39 (Mar)
food and physical activity choices, S11–S20 (Mar)
in Chile, 175 (Jun)
influence of eating at home on healthy diet, 57–60 (Feb)
model for social change, S58 (Mar)
LIPIDEMIA
response of patients with type 2 diabetes mellitus to high-fiber diet, 52–55 (Feb)
LIPIDS
effects on neurodevelopment, S34–S48 (Aug)
LIPID-SOLUBLE NUTRIENTS
effects of phytosterols, 21–24 (Jan)
LIPOPROTEINS
American Heart Association Dietary Guidelines for 2000, 300–302 (Sep)
effects of nuts on coronary heart disease risk, 103–111 (Apr)

LISTERIA MONOCYTOGENES
characteristics, 183–184 (Jun)
control efforts, 188–192 (Jun)
food pathogen, 183–194 (Jun)
North American outbreaks, 184–186 (Jun)
LIVER
retinoic acid homeostasis, 391–394 (Dec)
L-TRYPTOPHAN
association with malnutrition and brain development, S49–S59 (Aug)
monoamines and dietary protein intake, S60–S68 (Aug)
LUNG
antioxidant therapy for bronchopulmonary dysplasia, 10–17 (Jan)

MACRONUTRIENTS
during brain development, S49–S59 (Aug)
MALNUTRITION
contributions of Joaquín Cravioto to research on malnutrition and mental development, S2–S6 (Aug)
effects on cognitive development, S7–S12 (Aug)
effects on neurotransmitter formation during brain development, 344–346 (Oct)
incidence of neural tube defects, S21 (Aug)
tube feeding in patients with advanced dementia, 86–88 (Mar)
MEAT
meat consumption and risk for colorectal cancer, 37–47 (Feb), [letter] 375–377 (Nov)
MELATONIN
absorption and bioavailability, 288–298 (Sep)
as an indirect antioxidant and free radical scavenger, 286–287 (Sep)
in plants, 286–290 (Sep)
MEMORY
effects of antioxidants, S75–S82 (Aug)
impact of glucose supply to brain, S20–S21 (Jan)
METABOLISM
application of genomics and proteomics in nutrition metabolism, 259–263 (Aug)
energy metabolism, S13–S16 (Jan)
weight loss, S25–S26 (Jan)
METHYLENETETRAHYDROFOLATE REDUCTASE
incidence of neural tube defects associated with hyperthermia, S21 (Aug)
MEXICO
contributions of Joaquín Cravioto to malnutrition research, S2–S6 (Aug)
MICRONUTRIENTS
copper homeostasis, 281–285 (Sep)
health outcomes in children and human immunodeficiency virus, 358–369 (Nov)
MITOCHONDRIAL DISEASE
mitochondrial gene expression in diabetes mellitus,

61–70 (Mar)
MODELLING
determinants of physical activity and eating behavior, S11–S20 (Mar), S21–S39 (Mar), S58 (Mar)
MONOAMINES
relation to protein intake, S60–S68 (Aug)
MOOD
effects of ginseng, ephedrine, and caffeine, 91–102 (Apr)
impact of glucose supply to brain, S20–S21 (Jan)
MORTALITY
rates in Chile, 170–171 (Jun)
relation to alcohol consumption, 293–297 (Sep)
relationship of maternal nutrition and perinatal survival, 315–326 (Oct)
MUSCLE
uncoupling proteins during starvation, 56–57 (Feb)

NEURAL TUBE DEFECTS
description and prevention, S23 (Aug)
folate metabolism, 215–235 (Jul)
folate-sensitive models, S14–S17 (Aug)
incidence, S13 (Aug)
role of folate in prevention, S13–S23 (Aug)
NEUROCHEMICALS
influence on mental energy, S22–S24 (Jan)
NEURODEVELOPMENT
effects of lipids, S34–S48 (Aug)
NEUROTRANSMITTERS
formation during brain development, S49–S59 (Aug)
NEW ZEALAND
nutrition and physical activity initiatives, S45–S52 (Mar)
N-NITROSO COMPOUNDS
meat consumption and risk for colorectal cancer, 37–47 (Feb)
NORWAY
nutrition and physical activity initiatives, S45–S52 (Mar)
NUTRITION
application of genomics and proteomics in nutrition metabolism, 259–263 (Aug)
birth weight, 317–322 (Oct)
contributions of Joaquín Cravioto to research, S2–S6 (Aug), S11 (Aug)
effects of nutrition on cognitive development, S7–S12 (Aug), S24–S33 (Aug)
effects on aging, S88–S92 (Aug)
effects on mitochondrial gene expression in diabetes mellitus, 61–70 (Mar)
influence of eating at home on healthy diet, 57–60 (Feb)
link with physical activity, S57 (Mar)
micronutrient deficiencies and health outcomes in children, 358–369 (Nov)
micronutrient deficiencies in human immunodeficiency virus, 358–369 (Nov)
models of international initiatives for lifestyle changes, S45–S56 (Mar)
relationship of maternal nutrition and perinatal survival, 315–326 (Oct)
transition in Chile, 170–176 (Jun)
transition in India and China, 379–390 (Dec)
NUTS
effects on coronary heart disease risk, 103–111 (Apr)

OBESITY
American Heart Association Dietary Guidelines for 2000, 298–299 (Sep)
childhood growth percentiles, 31–36 (Feb)
determinants of eating behavior, S11–S20 (Mar)
dietary energy density and weight regulation, 247–258 (Aug)
effecting social change in lifestyle choices, S40–S56 (Mar)
effects of dietary fiber on weight regulation, 129–139 (May)
effects of maternal dieting while breastfeeding on infant growth, 18 (Jan)
influence of environmental and societal factors on food choice, S21–S39 (Mar)
Latin America, 172–174 (Jun)
lifestyle-related disease, S7–S9 (Mar)
psychological and cultural aspects of energy, S5–S12 (Jan)
resistance to weight gain during overeating, 48–51 (Feb)
OSTEOPOROSIS
bone remodeling transient, 327–333 (Oct)
calcium absorption and risk for hip fracture, 338–341 (Oct)
OVEREATING
resistance to weight gain, 48–51 (Feb)

PANAX GINSENG
effects on cognitive performance, mood, and energy, 91–102 (Apr)
PANCREATIC CANCER
diabetes mellitus as a risk factor, 112–115 (Apr)
PARATHYROID HORMONE
bone remodeling transient, 327–333 (Oct)
PARKINSON'S DISEASE
iron toxicity, S83–S87 (Aug)
PARTNERSHIP TO PROMOTE HEALTHY EATING AND ACTIVE LIVING
background, S2–S3 (Mar)
PHYSICAL ACTIVITY
determinants of physical activity behavior, S11–S20 (Mar)
discussion of model to change lifestyle choices, S57–S62 (Mar)
influence of environmental and societal factors, S21–

S39 (Mar)
international initiatives, S40–S56 (Mar)
interventions to reduce cardiovascular disease risk, 197–215 (Jul)
lifestyle-related disease, S7–S9 (Mar)
link with nutrition, S57 (Mar)
role in lowering cancer risk, 349–357 (Nov)
within schools to effect lifestyle change, S60 (Mar)
PHYTOSTEROLS
use in foods, 21–24 (Jan)
POLICY
American Heart Association Dietary Guidelines for 2000, 298–306 (Sep)
changes in scientific approach to infant nutrition, S24 (Aug)
control of *Listeria monocytogenes*, 183–194 (Jun)
iodine, 269–278 (Aug)
regulation of food claims for energy, S33–S34 (Jan), S35 (Jan), S36–S38 (Jan)
transmission of human immunodeficiency virus during breastfeeding, 119–127 (Apr)
PREGNANCY
high calcium intake to lower blood lead, 152–156 (May)
relationship of maternal nutrition and perinatal survival, 315–326 (Oct)
weight gain, 316–317 (Oct)
PROTEIN
nutrition in the elderly, S88–S92 (Aug)
relation to monoamines, S60–S68 (Aug)
PROTEOMICS
applications in nutrition metabolism research, 259–263 (Aug)
PUBLIC HEALTH
association of alcohol consumption and mortality, 293–297 (Sep)
Defining Energy for a New Millenium [conference proceedings], S1–S39 (Jan)
determinants of physical activity and eating behavior, S11–S20 (Mar)
discussion of model to change lifestyle choices, S57–S62 (Mar)
effecting social change, S40–S56 (Mar)
identifying a crisis to effect change, S44 (Mar), S57–S60 (Mar)
influence of nutrition on cognitive development, S24–S33 (Aug)
lifestyle-related disease, S4–S6 (Mar), S7–S9 (Mar), S10 (Mar)
model of determinants of physical activity and eating behavior, S13 (Mar), S23–S25 (Mar)
nutrition transition in Chile, 170–176 (Jun)
Partnership to Promote Healthy Eating and Active Living, S2–S3 (Mar)
Summit on Promoting Healthy Eating and Active Living: Developing a Framework for Progress [conference proceedings], S1–S76 (Mar)
Third Nestlé Nutrition Conference: Nutrition and Brain Function from Infancy to Old Age [conference proceedings], S1–S103 (Aug)
transmission of human immunodeficiency virus during breastfeeding, 119–127 (Apr)
trends in diet, nutritional status, and disease in India and China, 379–390 (Dec)
PUNE MATERNAL NUTRITION STUDY
insulin resistance syndrome in India, 4–5 (Jan)

RETINAL
cleavage of ß-carotene to, 116–118 (Apr)
RETINOIC ACID
homeostasis, 391–394 (Dec)
RHEUMATOID ARTHRITIS
effects of breastfeeding, 264–268 (Aug)
effects of vitamin E and fish oil in diet, 335–338 (Oct)
nutritional interventions, 266–267 (Aug)

SARCOPENIA
effects of nutrition in the elderly, S88–S92 (Aug)
SATIETY
dietary energy density and weight regulation, 247–258 (Aug)
effects of dietary fiber, 129–139 (May)
SEROTONIN
association of L-tryptophan with malnutrition and brain development, S49–S59 (Aug)
relation to dietary protein intake, S60–S68 (Aug)
SLEEP
discussion and clinical findings, S27–S29 (Jan)
stress and fatigue, S30–S32 (Jan)
SOCIETY
creating movement for social change, S59 (Mar)
discussion of model to change lifestyle choices, S57–S62 (Mar)
effecting social change, S40–S56 (Mar)
factors influencing food choice and physical activity, S21–S39 (Mar)
SODIUM
sodium restriction in managing hypertension, 291–293 (Sep)
STARVATION
response of uncoupling proteins in skeletal muscle, 56–57 (Feb)
STRESS
energy expenditure, S30–S32 (Jan)
STROKE
association of fruits and vegetables with risk, 24–27 (Jan)
SUPPLEMENTATION
antioxidants and cognitive function, S75–S82 (Aug)
effects of vitamin E and fish oil in diet on rheumatoid arthritis, 335–338 (Oct)
folic acid for prevention of neural tube defects, 215–235 (Jul), S13–S23 (Aug)
influence on mental energy, S22–S24 (Jan)

micronutrient deficiencies and health outcomes in children, 358–369 (Nov)
micronutrient deficiencies in human immunodeficiency virus, 358–369 (Nov)
populations at risk for zinc deficiency, 80–84 (Mar)
role of iron in risk for colorectal cancer, 140–148 (May)
to promote fetal growth, 318–322 (Oct)
SWEDEN
nutrition and physical activity initiatives, S45–S52 (Mar)

TASTE
genetic studies of taste perception, 163–165 (Jun)
science and complexity of bitter taste, 163–169 (Jun)
THE NETHERLANDS
nutrition and physical activity initiatives, S45–S52 (Mar)
THERMOGENESIS
nonexercise activity thermogenesis, 48–51 (Feb)
THIAMIN DEFICIENCY
in heart failure patients [letter], 342–344 (Oct)
TUBE FEEDING
patients with advanced dementia, 86–88 (Mar)
TYROSINE
relation to monoamine synthesis, S60–S68 (Aug)

UNCOUPLING PROTEINS
in skeletal muscle during starvation, 56–57 (Feb)

VASCULAR DISEASE
effects of lowering plasma homocysteine levels on risk, 242–244 (Jul)
VEGETABLES
association with risk of ischemic stroke, 24–27 (Jan)
influence of family and childcare providers on consumption, 224–235 (Jul)
risk for colorectal cancer, 395–399 (Dec)
VITAMIN A
cleavage of ß-carotene to retinal, 116–118 (Apr)
conversion of ß-carotene to vitamin A [letter], 309 (Sep)
health status in children, 358–369 (Nov)
human immunodeficiency virus, 358–369 (Nov)
retinoic acid homeostasis, 391–394 (Dec)
VITAMIN B
effects of lowering plasma homocysteine levels on vascular disease risk, 242–244 (Jul)
VITAMIN B_6
neurocognitive function in the elderly, S69–S74 (Aug), S89 (Aug)
VITAMIN B_{12}
neurocognitive function in the elderly, S69–S74 (Aug), S89 (Aug)
VITAMIN E
effects on rheumatoid arthritis, 335–338 (Oct)

WEIGHT LOSS
energy, S25–S26 (Jan)
WOMEN
eating disorders in young females with type 1 diabetes mellitus, 179–182 (Jun)
interventions to reduce cardiovascular disease risk, 197–215 (Jul)
iodine in human milk, 269–278 (Aug)
maternal dieting while breastfeeding and infant growth, 18 (Jan)
relationship of maternal nutrition and perinatal survival, 315–326 (Oct)
whole grain intake and risk of ischemic stroke, 149–152 (May)

ZINC
populations at risk for deficiency, 80–84 (Mar)
supplementation and health outcomes in children, 361 (Nov)
